

Intelliprint

TallyGenicom's Printer Resident Software

Produce professional-quality transaction documents, eliminate expensive pre-printed forms and reduce network traffic without additional server based software.

Look Better

Now you can save money and enhance your corporate image by using Intelliprint software on selected TallyGenicom laser printers. Intelliprint allows you to eliminate costly pre-printed forms, quickly and easily update your forms as needed.

Better Systems Architecture

To print your transaction documents, your choice has been to send small, compact print jobs to impact printers using costly pre-printed forms, or send very large, network-taxing print jobs to laser printers for more attractive output. Now you can have the best of both approaches. Send small, compact print jobs to selected TallyGenicom laser printers for better output. No costly pre-printed forms, no heavy network traffic.

Be Creative

With Intelliprint, you get hassle-free printing of professional looking transaction documents. Print invoices, purchase orders, packing slips, bills of lading, customer correspondence, and more from your existing compact print data stream. Add bar codes, graphics, forms, promotional messages, conditional formatting with Intelliprint – all added to your data stream inside the printer for fast processing and immediate printing.

Make It Easy

Intelliprint combined with the exclusive Intellifilter and PlanetPress, resolves compatibility issues with your original print data stream – without reprogramming your host application. Intellifilter is resident in the TallyGenicom laser printers and enables a quick, non-disruptive implementation of the TallyGenicom printing system.

Get Intelliprint

- Eliminate form production and storage costs.
- Reduce labor associated with handling and sorting pre-printed forms.
- Eliminate printer down time changing forms.
- Printer-resident Intellipress eliminates excessive network traffic.
- Forms can be designed using PlanetPress or TG forms for complete flexibility.

Features & Specifications

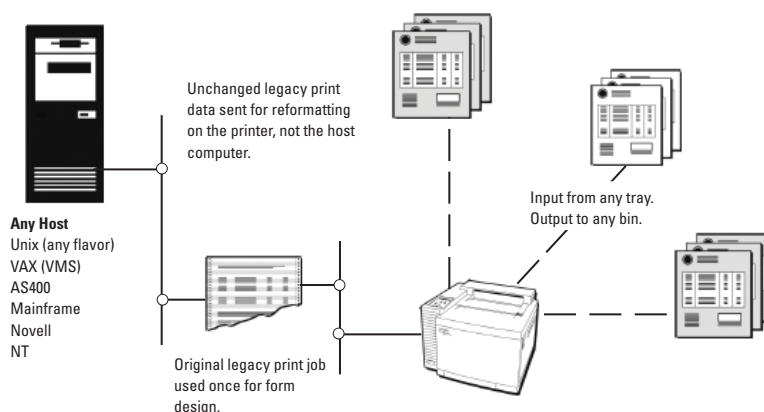

- No software to install on the host.
- Supports existing print streams without changes to the application.
- Improve print productivity through PostScript level II forms caching for all images, including all page frames, signatures and logos (fixed-size) allowing full engine speed on complex graphical forms.
- Remote forms management over the network.
- PC-based WYSIWIG development process ensures rapid application migration and development. Intelliprint can use a Windows-based front-end and visual editor for the job construction, including powerful form design capabilities. Once the form is designed and downloaded, the PC is no longer required (Intelliprint laser printers only).
- Import/scan images (BMP and EPS) and incorporate them in the form.
- Application data remains separate from formatting information, eliminating problems with future conversion of legacy applications.
- Intelligent print stream processing extracts, formats, and repositions text on the page, and lets you select the number or types of copies to be produced, or images (i.e., logos or signatures) to be overlaid.
- Ability to format selections of application data with different fonts, line spacing, orientation and placement.
- Create multiple copies of data to be placed on multipart forms with the ability to apply different formats to each part.
- Any form element can be conditionally printed based on the absence or presence of key words (characters) in the application data stream.
- Supports scanned images for logos, signatures.
- Ability to print multiple logical pages of data on one physical page (n-up printing).
- Provides access to the powerful features of PostScript printing (paper handling) through TallyGenicom PS PPD driver files.

Before Intelliprint

- Print Shop expenses for pre-printed forms
- Wasted space storing pre-printed documents
- Long printing process
- Wasted time manually bursting and decollating
- Wasted sheets due to faulty alignment
- Complicated and expensive to make changes to forms
- Time consuming to sort and file copies
- Downtime between jobs (changing paper, realigning printer, etc.)

After Intelliprint

- Print on Demand
- No need for pre-printed forms
- No special paper required
- Input selection and output sorting of copies
- Variable data printing
- Professional-looking forms created directly on the laser printer
- Compatible with existing data format
- Drives printers at rated speed
- Forms are easily created and updated according to specific needs

Current Products Supported

- ML450
- IP8008
- IP9035NRange
