

PlanetPress Image

Go digital!

Email and archive your documents automatically

PlanetPress Image is a companion product to PlanetPress Watch, which enables PDF, TIFF or JPG image generation to automatically email or archive your transactional and promotional documents.

Give the people what they want!

For those customers who prefer communications via email, set up automated output specifications so they'll get what they want.

Freedom from file cabinets.

Cut down on the cost and hassle of keeping hard copies of all your documents. Archive them as digital images. PlanetPress Image produces a highly searchable indexed file to streamline the location and retrieval process. The small file format allows efficient storage and transfer to a shared folder on the network or to your third party electronic document management system.

Benefits

- Feed any archiving system
- Up to the minute results
- Full control over PDF creation and security settings
- Free up floor space from file cabinets for better

Business Application

Provide email delivery options to your customers. Give your customers the option of selecting their preferred communication channel and save that preference into your database.

Leverage the power of the Web. Implement an e-fulfillment service on your web site. Let your customers select what kind of information they want to receive, then send them their own personalised PDF document via email.

Quick information retrieval. Digital archives are more easily accessible and searchable than hard copies. Create your own information repository and use PlanetPress Search to extract the information that you need, when you need it.

Departmental reports where you need them. Reports delivered electronically, by department or location. Eliminate the need to hand sort, staple, then deliver.

Electronic archiving. Automatically route digital files of transactional or 1:1 marketing communications created in PlanetPress to your electronic document management system or a directory on your server.

Features

PlanetPress

PDF for email and archive. The PDF version can look exactly like the original being printed, if there is a printed copy at all, or can be completely different – whatever your preference. When printing, emailing and archiving, all three documents may or may not look the same or contain the same information - your choice.

Full integration with PlanetPress Search. When designing an Intelligent Document with PlanetPress, any number of fields can be tagged as indexes for later search and retrieval using PlanetPress Search.

Restricted document access. Set permission privileges on PDF files, including text modification, text copying, annotation rights and printing rights.

Workflow security. For increased security and reliability, PlanetPress Imager runs as a service.

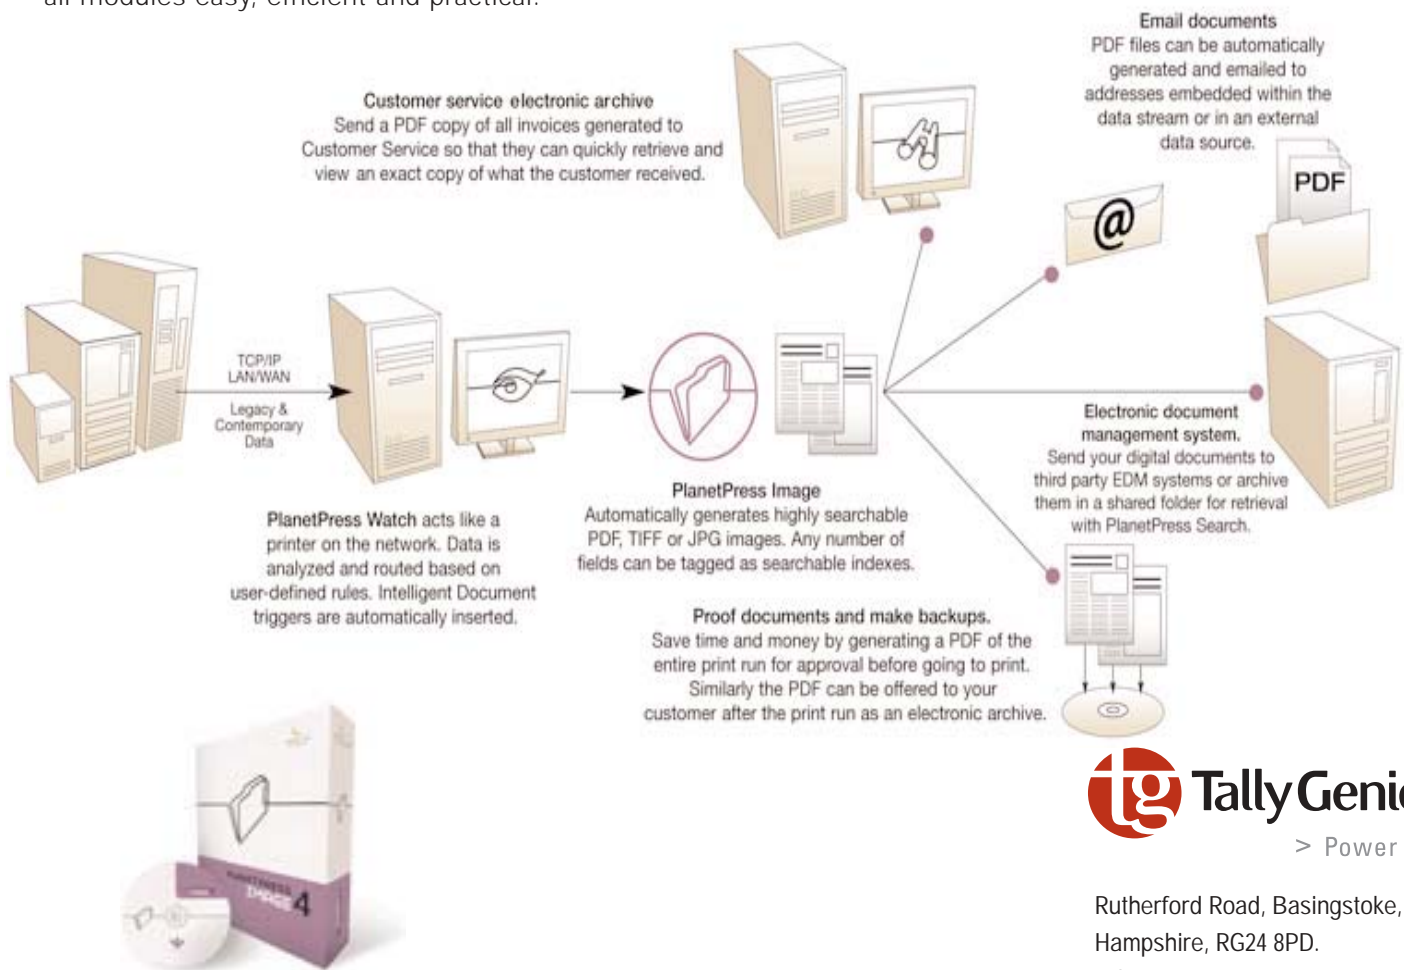

Email flexibility. Use either SMTP or Outlook to send your emails.

Alternate output formats. From the same source documents, you may generate PDFs, TIFFs and JPGs. Provide navigational preview thumbnails for web-based access points to PDF libraries.

Application logging. For each digital file, a log is created to report any errors.

TIFF output for EDM. TIFF output with complete index file, for fast, accurate and automatic integration into third party electronic document management systems.

Documentation and online help. Comprehensive documentation structured to make learning and using all modules easy, efficient and practical.
